linkedin.com/in/tpaixaodomingues

SKILLS

AI / coding assistants

Cursor, Claude, GitHub Copilot, ChatGPT

Languages

Python, SQL, R, Scala

Platforms & data

Databricks, Spark, Apache NiFi, Hive, HDFS; MySQL, PostgreSQL, MariaDB, SQL Server, Oracle

Cloud

AWS (S3, Glue, Athena, Kinesis, SageMaker, EC2, DynamoDB); Azure (Blob, Cosmos DB, Synapse, Data Factory, AI Studio)

ML / GenAI

Time series, unsupervised learning, ensembles, Bayesian methods, neural nets, LLMs, RAG, agentic workflows

BI & tools

Power BI, Qlik, Excel, LaTeX

Spoken languages

Portuguese (native), English (fluent), Spanish (conversational)

CERTIFICATIONS

Databricks Certified Generative AI Engineer Associate

Databricks

Delta Lake Fundamentals Accreditation

Databricks · May 2021

Data Scientist with Python (career track)

DataCamp · Jul 2020

Macroeconometric Forecasting using EViews

IMF · May 2018

EDUCATION

Nova IMS

2020 – 2021

Postgraduate (PgD) in Enterprise Data Science and Analytics (in partnership with Microsoft) — 17/20

ISEG

2015 – 2017

Master (MSc) in Monetary and Financial Economics — 14/20

ISCTE Business School, Lisbon

2011 – 2014

Bachelor (BSc) in Economics — 14/20

PUBLICATIONS

Global Value Chains and Vertical Specialization: The case of Portuguese exports — WIOD GVC / vertical specialization analysis.

The Determinants of TFP Growth in the Portuguese Service Sector — Firm-level panel (2010–2016); Levinsohn–Petrin TFP.

Can a small leak sink a great ship? Portuguese household savings — HFCS microdata and saving-rate forecasting.

ACTIVITIES

Collaborator — Web Summit. Event operations and community engagement; previously staff/monitor for Web Summit 2019 and related Lisbon tech/economy forums (EEA/EMES, Nova IMS, EY Beyond Portugal, Economia VIVA).

Press & award. Research cited by OECD; media collaborations with RTP2, Expresso, Diário de Notícias, and Dinheiro Vivo. Best article award, APS Call for Papers “Poupança e Financiamento da Economia Portuguesa”.

PROFILE

AI and data engineering leader with 8+ years across consulting, financial services, utilities, and public policy. Currently Manager in the AI Hub at EY-Parthenon, delivering generative AI and agentic solutions for strategy and transformation clients. Previously led firm-wide Wealth data engineering at Mercer (MMC Tech) on Databricks, Python, and AWS, after earlier roles advising the Portuguese Ministry of Economy on digital and economic indicators.

EXPERIENCE

Manager, AI Hub · AI Engineer

March 2026 – present

EY-Parthenon

Design and deliver generative AI solutions for strategy, transactions, and transformation engagements. Combines hands-on AI engineering with consulting delivery, translating business problems into production-ready LLM and agentic workflows.

- Build GenAI and agentic solutions (RAG, automation, copilots) aligned with client outcomes and EY delivery standards.
- Drive AI-native engineering practice with Cursor, Claude, and GitHub Copilot across prototyping, review, and production.
- Collaborate with partners and cross-functional teams to scale reusable AI patterns and turn ambiguous briefs into scoped technical designs.

Lead Data Engineer

August 2024 – December 2025

Mercer (MMC Tech) · Wealth Business

Led data engineering for the Wealth line of business at firm-wide level, combining hands-on delivery with leadership of engineers, analysts, architects, and developers.

- Owned roadmap and delivery of Wealth data platforms on Databricks, Python, and AWS.
- Directed cross-functional engineering teams to ship on schedule and aligned with business goals.
- Engaged senior stakeholders on prioritisation, architecture trade-offs, and value realisation for analytics and reporting.

Data & Analytics Engineer

April 2023 – August 2024

Mercer · Global Metrics

Data Engineer on the Global Metrics team, responsible for ETL quality and availability for Qlik developers across Mercer and Marsh, collaborating across lines of business and geographies.

- Built and maintained ETL pipelines feeding BI solutions for Mercer and Marsh stakeholders.
- Used Python, Apache NiFi, Qlik, and AWS (S3, Athena, Glue, SageMaker) to improve pipeline performance and data quality.
- Aligned data solutions with strategic reporting and metrics needs alongside senior stakeholders.

Data & Digital Analyst

October 2021 – April 2023

Mercer · Wealth Business Transformation (Portugal)

Delivered process automation and BI for Wealth Transformation in Portugal, advising senior managers on digital transformation. Impact tracked via reduced operational FTE effort, team upskilling, and faster decision-making.

- Designed automation and BI solutions that streamlined operations and informed Wealth decisions.
- Upskilled 500+ colleagues (actuaries, managers, finance) in Python, Power Automate, and Power BI.
- Advised senior managers on digital transformation strategy and technology alignment.

Big Data Analyst

January 2021 – October 2021

Timestamp

Big Data Engineer / Cloud Developer supporting a major Portuguese utilities client on large-scale data and machine learning initiatives.

- Managed large-scale databases and optimised ETL workflows for utilities analytics and ML use cases.
- Delivered on Hadoop, Hive, Spark, Databricks, and Azure (Data Factory, Synapse) with senior engineering mentorship.

Data & Digital Advisor

June 2019 – January 2021

Office for Strategy and Research (GEE), Portuguese Ministry of Economy

Advised the Ministry's cabinet on strategic requests for Portugal's digital transition and represented Portugal in international expert groups monitoring digital indicators (OECD, IMF, ECB, World Bank). • Built digital tools that improved monitoring of Portugal's economy and digital transformation. • Strengthened collection, analysis, and reporting of key economic and digital indicators.

Data Analyst

January 2018 – June 2019

Office for Strategy and Research (GEE), Portuguese Ministry of Economy

Analysed national and international economic databases and indicators to support policy decisions. • Monitored Portugal's key economic indicators for policy support. • Conducted economic research underpinning data-driven national strategies.

Research Fellow

January 2016 – July 2016

Portuguese Ministry of Health — Insurance Office

Paid internship researching contribution strategies for the public-function insurance system and delivering a tool to evaluate the economic impact of policy options. • Produced technical research on alternative contribution strategies for the insurance system. • Introduced an evaluation tool that improved assessment of policy introduction impacts.

ADDITIONAL

Founder

December 2025 – present

Databypassion · Portugal

Independent applied data and generative AI products, advisory, and experimentation.

Product Owner

March 2023 – present

Jhonny Surf Store

Digital transformation for a Portuguese surf retail SME: operations, inventory, CX, and online growth.
