## PROFESSIONAL SUMMARY

Economist and AI / Data Engineer with 8+ years across public and private sectors. Currently AI Engineer (Manager, AI Hub) at EY-Parthenon, building generative AI and agentic solutions that connect strategy, technology, and delivery. Background in financial economics, large-scale data engineering (Databricks, AWS, Azure), and SME product work.

- **AI & consulting:** GenAI engineering and AI-assisted delivery with Cursor, Claude, and GitHub Copilot.
- **Data engineering:** Led firm-wide Wealth data initiatives at Mercer (MMC Tech) on Databricks, Python, and AWS.
- **Public sector:** 3+ years as economic analyst and digital advisor to the Portuguese Ministry of Economy.

## WORK EXPERIENCE

|                                                                                                                                                                                                                                                                                                                                                                                                  |                             |
