PROFESSIONAL SUMMARY

I am an Economist and AI / Data Engineer with 8+ years of experience across the public and private sectors, combining a solid academic background in Financial Economics with hands-on expertise in Data Analytics, Engineering, Automation, and Generative AI. I specialize in developing data-driven and AI-native solutions that connect business, technology, and people — creating value throughout the entire data and delivery lifecycle.

- **AI & consulting:** AI Engineer (Manager, AI Hub) at EY-Parthenon; GenAI and agentic delivery with Cursor, Claude, and GitHub Copilot.
- **Private sector:** 5+ years in analytics and data engineering in utilities and financial services, including Lead Data Engineer for Wealth at Mercer (MMC Tech).
- **Public sector:** 3+ years as economic analyst and digital advisor, providing data-driven insights for policymakers at the Portuguese Ministry of Economy.
- **Entrepreneurship:** Product Owner at Jhonny Surf Store and Founder at Databypassion — applied AI/data work with SMEs and independent products.

WORK EXPERIENCE

AI Engineer

March 2026 – present

EY-Parthenon (Manager, AI Hub)

Joined EY-Parthenon as Manager in the AI Hub, focused on designing and delivering generative AI solutions for strategy, transactions, and transformation clients. The role combines hands-on AI engineering with consulting delivery, translating business problems into production-ready LLM and agentic workflows.

- Build GenAI and agentic solutions (RAG, automation, copilots) aligned with client outcomes and EY quality standards.
- Lead AI-native engineering practice using Cursor, Claude, and GitHub Copilot across prototyping, review, and production delivery.
- Partner with partners and cross-functional teams to scale reusable AI patterns; turn ambiguous business questions into scoped technical designs and delivery plans.

Founder

December 2025 – present

Databypassion · Portugal

Independent initiative at the intersection of data engineering, analytics, and generative AI — building products, advisory, and applied experiments outside large-firm delivery cycles.

- Explore and ship applied AI/data prototypes and advisory engagements for digital and analytics use cases.
- Combine product thinking with modern AI tooling (Cursor, Claude, Copilot) to accelerate experimentation and delivery.

Lead Data Engineer

August 2024 – December 2025

Mercer (MMC Tech) · Wealth Business

Led all data engineering initiatives for the Wealth Business at MMC Tech at firm-wide level. The role combined hands-on technical work with leadership of engineers, analysts, architects, and developers, balancing delivery, stakeholder management, and business outcomes.

- Owned roadmap and delivery of high-impact Wealth data platforms on Databricks, Python, and AWS.
- Oversaw cross-functional engineering teams to ship on time and aligned with business goals.
- Engaged senior stakeholders on prioritisation, architecture trade-offs, and value realisation for analytics and reporting.

Data & Analytics Engineer

April 2023 – August 2024

Mercer · Global Metrics

After Wealth Transformation in Portugal, joined the Global Metrics team as a Data Engineer responsible for ETL quality and availability for Qlik developers across Mercer and Marsh, collaborating across lines of business and geographies within the MMC group.

- Developed and maintained ETL pipelines feeding BI solutions for Mercer and Marsh stakeholders.
- Used Python, Apache NiFi, Qlik, and AWS (S3, Athena, Glue, SageMaker) to optimise pipeline performance and data quality.
- Partnered with senior stakeholders to align data solutions with strategic reporting and metrics needs.

Data & Digital Analyst

October 2021 – April 2023

Mercer · Wealth Business Transformation (Portugal)

Joined Mercer in the Wealth Business Transformation team in Portugal, delivering process automation and BI solutions, and advising senior managers on digital transformation. Impact was measured by reduced operational FTE effort, continuous upskilling, and faster decision-making.

- Designed automation and BI solutions that optimised operations and guided Wealth business decisions.
- Upskilled 500+ colleagues (actuaries, managers, finance) in Python, Power Automate, and Power BI.
- Advised senior managers on digital transformation strategy and technology alignment.

Product Owner

March 2023 – present

Jhonny Surf Store

Led digital transformation for a Portuguese surfing retail SME, applying technology to operations, customer experience, inventory, and online growth — combining professional data/AI expertise with hands-on SME product ownership.

- Streamlined operations and inventory management with data-driven decision-making.
- Improved customer experience and scaled the online channel through iterative product delivery.

Big Data Analyst

January 2021 – October 2021

Timestamp

First professional role in IT as Big Data Engineer / Cloud Developer at Timestamp, an analytics and cloud solutions firm, supporting a major Portuguese utilities client on large-scale data and ML initiatives.

- Managed large-scale databases and optimised ETL workflows for utilities analytics and ML use cases.
- Worked with Hadoop, Hive, Spark, Databricks, and Azure (Data Factory, Synapse) alongside senior engineers.

Data & Digital Advisor

June 2019 – January 2021

Office for Strategy and Research (GEE), Portuguese Ministry of Economy

Supported economic initiatives and the Ministry's cabinet on strategic requests, with a focus on Portugal's digital transition. Represented the Portuguese Republic in international research and expert groups monitoring digital indicators from OECD, IMF, ECB, and World Bank.

- Developed digital tools that improved monitoring of Portugal's economy and digital transformation.
- Enhanced data collection, analysis, and reporting for key economic and digital indicators.
- Conducted economic research supporting high-level, data-driven government decisions.

Data Analyst

January 2018 – June 2019

Office for Strategy and Research (GEE), Portuguese Ministry of Economy

Started as Data Analyst for the Portuguese Government, working with extensive economic databases and national/international indicators to inform policy decisions.

- Monitored and analysed Portugal's key economic indicators for policy support.
- Conducted economic research underpinning data-driven national economic strategies.

Research Fellow

January 2016 – July 2016

Portuguese Ministry of Health — Insurance Office

Six-month paid internship researching contribution strategies for the national public-function insurance system and delivering a technical tool to evaluate the economic impact of policy options.

- Produced technical research on alternative contribution strategies for the insurance system.
- Introduced an evaluation tool that improved efficiency in assessing policy introduction impacts.

TECHNICAL SKILLS

AI / coding assistants: Cursor (Advanced), Claude (Advanced), GitHub Copilot (Advanced), ChatGPT

Languages & tools: Python, SQL, R, Scala

Databases: MySQL, PostgreSQL, MariaDB, SQL Server, Oracle

AWS: S3, Glue, Athena, Kinesis, SageMaker, EC2, DynamoDB

Azure: Blob Storage, Cosmos DB, Spot VMs, AI Studio, Synapse, Databricks, Data Factory

Frameworks / platforms: Spark, Hive, Apache NiFi, HDFS, Databricks

Machine learning / GenAI: Time series, unsupervised learning, ensembles, Bayesian methods, decision trees, neural networks, LLMs, RAG, agentic workflows

BI: Power BI, Qlik, Excel · **Other:** LaTeX, Stata, EViews

Languages: Fluent in Portuguese and English; conversational Spanish

EDUCATION

Nova IMS — Information Management School, Lisbon Postgraduate (PgD) in Enterprise Data Science and Analytics (in partnership with Microsoft) — 17/20	2020 – 2021
ISEG — Lisbon School of Economics and Management, Lisbon Master (MSc) in Monetary and Financial Economics — 14/20	2015 – 2017
ISCTE Business School, Lisbon Bachelor (BSc) in Economics — 14/20	2011 – 2014
ISCTE — IUL, Lisbon Bachelor (BSc) in Anthropology (Frequency)	2010 – 2011

CERTIFICATIONS

Databricks Certified Generative AI Engineer Associate	Databricks
Delta Lake Fundamentals Accreditation	Databricks · May 2021
Data Scientist with Python (career track)	DataCamp · Jul 2020
R Programming	Coursera / Johns Hopkins · Jul 2020
Macroeconometric Forecasting using EViews	IMF · May 2018
Policy Evaluation methods with Stata	Nova SBE · May 2019
Econometric Modeling with Stata · Microsoft Excel for the Data Analyst	Timberlake / Microsoft · 2018

SELECTED PUBLICATIONS

Global Value Chains and Vertical Specialization: The case of Portuguese exports

WIOD-based assessment of Portugal's GVC participation: trade geography, vertical specialization, and value-added / employment coefficients. Vertical specialization rose despite the financial crisis.

The Determinants of TFP Growth in the Portuguese Service Sector

Firm-level panel (2010–2016): Levinsohn–Petrin TFP and fixed-effects models. Positive links with financial health, innovation, and wage premium; non-linear effects of capital intensity, training, and age.

Can a small leak sink a great ship? A comprehensive analysis of Portuguese household savings

HFCS microdata and a time-series consumption model for the household saving rate. Heterogeneity and credit constraints matter; the 2008 rise in savings reflected temporary income and wealth shocks.

ACTIVITIES & AWARDS

Collaborator — Web Summit

Collaborator supporting event operations and community engagement at Web Summit. Previously participated as staff/monitor for Web Summit 2019, helping bridge people, business, and technology in Lisbon's tech ecosystem.

Conference & seminar staff

Organised and supported conferences and economic seminars, including the Annual Congress of the European Economic Association and Econometric Society (EEA/EMES) — ISCTE; Insights Data Science — Nova IMS; Beyond Portugal Digital Transformation — EY; and Economia VIVA — Nova SBE.

Volunteer — Associação Moinho da Juventude

For roughly two years, collaborated with this non-profit in Cova da Moura (Lisbon): organised guided community visits and supported local entrepreneurs in the business hub.

Associate — ISCTE Students' Union

Organised academic events (seminars, conferences, debates) and maintained the relationship between the students' union and the University's scientific committee.

Press / media collaborator

Research findings referenced on the OECD website; collaborations with RTP2, Expresso, Diário de Notícias, and Dinheiro Vivo.

Award — Best article

Winning best article, Call for Papers “Poupança e Financiamento da Economia Portuguesa”, Associação Portuguesa de Seguradores (APS).

International experience

Summer School, Islington Centre for English, London (June – September 2014): improved language and soft skills in an international setting after completing the undergraduate degree in Economics.
